

### **MULTIFAMILY REPORT**

## Early Autumn In Portland

October 2022

Rent Growth Moderates, On Par With US

Investors Pause, Transactions Nearly Halt

In-Migration Moderates, Occupancy Declines

### **PORTLAND MULTIFAMILY**

### Seasonal Slowdown Across Fundamentals

Portland's multifamily sector posted steady improvement this year, largely mirroring the national market. Rent gains moderated, to 0.6% on a trailing three-month basis through August, on par with the national average, but the movement can be attributed to a typical seasonal softening. The occupancy rate in stabilized properties declined 30 basis points year-over-year as of July, but at 96.2%, it is still a tight rental market.

Unemployment stood at 3.6% in July, 10 basis points below the state and the U.S. (both 3.5%). The employment market expanded 5.4%, or 65,800 jobs, in the 12 months ending in June, outperforming the nation by 70 basis points. Still in recovery mode, the leisure and hospitality sector led gains, up by 20,500 jobs. Manufacturing came in second with the addition of 8,400 jobs, aided by the opening of Intel's latest factory expansion in Hillsboro, where some 2,000 employees were hired in the past year.

Development remained robust, with 3,335 units delivered through August and another 9,967 units underway. Construction starts doubled in 2022 through August compared to the corresponding period last year, but delays are likely to affect project deliveries due to challenges including supply-chain issues and rising prices for construction materials. Meanwhile, transaction activity nearly came to a halt in July, with the total through August at just \$727 million, for a price per unit that rose 15.5% year-over-year.

### **RENT TRENDS**

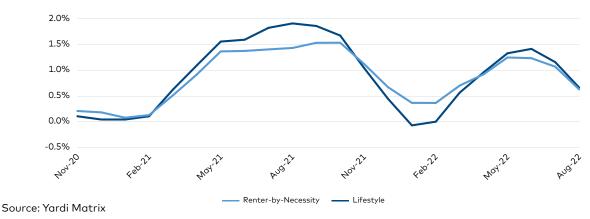

- > Portland rents rose 0.6% on a trailing threemonth (T3) basis through August, on par with the national average. The overall asking rent in the metro rose to \$1,759, slightly above the \$1,718 U.S. figure. On an annual basis, rates in Portland were up 9.9%, 100 basis points behind the national figure.
- Despite robust deliveries consisting of mainly upscale Lifestyle units, rent development for the segment stood at 0.7% on a T3 basis through August, to \$1,942, 10 basis points higher than rents in the working-class Renterby-Necessity segment, which increased to an average of \$1,560.
- The occupancy rate in stabilized properties was down 30 basis points year-over-year as of

- August, a sign that in-migration is moderating and recent supply has yet to be absorbed. Still, at 96.2%, it showcases a tight rental market. Occupancy declined evenly in both segments, to 96.7% for RBN units and 95.7% for Lifestyle apartments.
- > Of the 57 submarkets tracked by Yardi Matrix, 26 posted double-digit year-over-year rent growth. In August, six submarkets had an average above the \$2,000 mark, up from two a year ago. Lake Oswego (11.3% to \$2,436) and Pearl District (3% to \$2,121) remained the most expensive areas.
- In the SFR sector, rents rose 11.9% year-overyear through August, but occupancy decreased 1.6% in the 12 months ending in July.

### Portland vs. National Rent Growth (Trailing 3 Months)

### Portland Rent Growth by Asset Class (Trailing 3 Months)

### **ECONOMIC SNAPSHOT**

- Portland's economy has made good strides since the peak of the health crisis but has yet to fully rebound to pre-pandemic levels. Unemployment stood at 3.6% in July, according to preliminary data from the Bureau of Labor Statistics but started climbing again from 3.1% in May. Still, its performance is only slightly below the state and the U.S., both at 3.5% in July.
- The employment market expanded 5.4% in the 12 months ending in June, 70 basis points above the national rate. This translated into the addition of 65,800 jobs, with all sectors gaining positions. The sustained recovery of the leisure and hospitality sector maintained its lead, up 20.5%
- or 20,500 jobs. Manufacturing, professional and business services and education and health services added 8,200 and 8,400 jobs, respectively.
- Manufacturing, and especially semiconductor manufacturing, has been one of Oregon's main economic drivers during the past decade, with the most recent expansion being that of Intel, in April. The company opened its \$3 billion factory in Hillsboro, known as Gordon Moore Park at Ronler Acres, where it hired 2,000 employees in the past year. Intel's decision to expand into Ohio pushed local leaders to form a task force reviewing the state's legislation pertaining to the chip industry.

### Portland Employment Share by Sector

### **Population**

- For the first time since 2010, Portland's population decreased during the second year of the pandemic. The metro lost 4,618 residents in 2021, a 0.2% demographic contraction.
- Meanwhile, the U.S. population increased by 0.1%.

### Portland vs. National Population

|          | 2018        | 2019        | 2020        | 2021        |
|----------|-------------|-------------|-------------|-------------|

### **SUPPLY**

- Portland developers added 3,335 units through August, 1.9% of existing stock and 60 basis points ahead of the U.S. rate, already significantly fewer than the 4,310 units delivered during the same interval in 2021. Since 2014, incoming inventory has accounted for an average of 3.4% of stock each year, but with market conditions pressured by economic woes, it's likely deliveries will continue to somewhat lag.
- > With the market benefiting from pandemicinduced migration patterns, especially from more expensive neighboring metros, developers remained focused on upscale projects, with roughly 85% of deliveries adding to the Lifestyle segment. The remaining 15% comprised units in fully affordable communities.
- The construction pipeline remained robust, with 9,967 units underway and another 28,500 in the planning and permitting stages. Of these, 4,314 units broke ground this year, more than double the 2,009 units that started construction during the same interval last year. The pipeline composition changed slightly, with more fully affordable properties underway (26.7% of pipeline), but the bulk is still focused on the Lifestyle segment (73.3%). Construction activity was spread out across

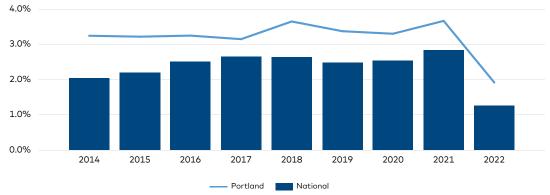

- the map, with 37 of the 58 submarkets tracked by Yardi Matrix having at least 50 units underway. Leading areas by number of units under construction were Downtown Vancouver (660 units), Kerns/Buckman (649 units) and Creswell Heights (616 units).
- ➤ The 424-unit West End District in Beaverton was the largest project delivered through August. Owned by Urban Form Development, it includes 32,000 square feet of retail space.

Source: Yardi Matrix

### **TRANSACTIONS**

- This year through August, the sales volume stood at \$727 million, half the \$1.5 billion total recorded during the same interval in 2021. Last year, Portland had a record year in multifamily sales, and while 2022 started with the same investor interest, the current economic landscape made investors cautious, with sales nearly coming to a halt at the start of the third quarter.
- > Sales composition shows greater investor interest in value-add opportunities, which accounted for two-thirds of the properties that
- traded. While sales activity began softening midsummer, investor competition was intense during previous months, which pushed the price per unit up by 15.5% year-over-year, to \$289,496, well ahead of the \$217,196 U.S. figure.
- River Ridge represented the highest selling price this year. Mountain West Investment sold the asset to Security Properties for \$70 million, or \$388,889 per unit, with aid from a \$51 million loan issued by Pacific Coast Capital Partners.

### **DEFINITIONS**

Lifestyle households (renters by choice) have wealth sufficient to own but have chosen to rent. Discretionary households, most typically a retired couple or single professional, have chosen the flexibility associated with renting over the obligations of ownership.

Renter-by-Necessity households span a range. In descending order, household types can be:

- > A young-professional, double-income-no-kids household with substantial income but without wealth needed to acquire a home or condominium;
- Students, who also span a range of income capability, extending from affluent to barely getting by;
- Lower-middle-income ("gray-collar") households, composed of office workers, policemen, firemen, technical workers, teachers, etc.;
- > Blue-collar households, which barely meet rent demands each month and likely pay a disproportionate share of their income toward rent;
- > Subsidized households, which pay a percentage of household income in rent, with the balance of rent paid through a governmental agency subsidy. Subsidized households, while typically low income, extend to middle-income households in some high-cost markets, such as New York City;
- ➤ Military households, subject to frequency of relocation.

These differences can weigh heavily in determining a property's ability to attract specific renter market segments. The five-star resort serves a very different market than the down-and-outer motel. Apartments are distinguished similarly, but distinctions are often not clearly definitive without investigation. The Yardi® Matrix Context rating eliminates that requirement, designating property market positions as:

| Market Position | Improvements Ratings |
|-----------------|----------------------|
| Discretionary   | A+ / A               |
| High Mid-Range  | A- / B+              |
| Low Mid-Range   | B / B-               |
| Workforce       | C+/C/C-/D            |

The value in application of the Yardi® Matrix Context rating is that standardized data provides consistency; information is more meaningful because there is less uncertainty. The user can move faster and more efficiently, with more accurate end results.

The Yardi® Matrix Context rating is not intended as a final word concerning a property's status—either improvements or location. Rather, the result provides reasonable consistency for comparing one property with another through reference to a consistently applied standard.
