## Tech Scene Continues to Thrive

Fueled by the continued expansion of the technology sector and population growth, Seattle's multifamily market remains healthy. However, the metro is showing signs of slowing, following the robust gains of the last several years. The metro has fallen from the list of top U.S. metros in year-over-year rent growth, and was negative in the most recent three-month period. That could be a short-term blip, but the weight of new supply and declining affordability could signal more moderate growth moving forward.

Job growth has been outpacing the national average since 2012. In the 12 months ending in October, the metro added 38,200 jobs, a 2.5% increase. Gains were led by the government sector, which added 8,100 positions. The tech industry continues to prosper, with the information sector adding 4,100 jobs, a 3.9% year-over-year change. As part of the metro's tech industry growth, companies such as Amazon, Google and Facebook are expanding in Puget Sound.

After reaching a cycle high in 2016, multifamily development has cooled off, with roughly 8,500 units coming online in the 12 months through October. With nearly 71,800 units in different stages of development—of which more than a third are under construction—rent growth is expected to temper. More than \$2.4 billion in multifamily assets changed hands as of October, mostly in suburban markets. Yardi Matrix forecasts rents to appreciate by 3.7% by year's end.

## Recent Seattle Transactions

## Rent Trends

- Rent growth in the metro fell to 3.7% in October 2017 from 6.5% in 2016, but remains above the 2.3% national average. The monthly rent was \$1,751 as of October, \$393 above the national average. Healthy job growth—which has been outpacing the nation’s average since 2012—coupled with a 1.9% population increase is likely to keep demand for housing robust.
- Rent growth in the region has decelerated, caused in large part by a heavy construction of luxury supply. Deliveries will add nearly 4% to stock in 2017. Rents in the Lifestyle segment rose 3.0% year-over-year, up to an average of \$1,960, while rents in the working-class Renter by Necessity segment increased 4.9%, to \$1,489.
- Submarkets with the highest rent growth included Enumclaw (15.3%), Kent (8.9%), Mill Creek (8.1%) and Belltown (7.6%), while submarkets with the highest rental rate included Bellevue (\$2,473), Belltown (\$2,440) and Mercer Island (\$2,232).
- With Seattle’s occupancy rate at 96.0% for stabilized properties as of September, the metro’s lack of affordable rental options and ongoing new deliveries are likely to put a damper on rent growth. Yardi Matrix forecasts rents to appreciate by 3.7% by year-end.

## Economic Snapshot

- The job market remains strong, as the metro added 38,200 jobs in the year ending in September, a 2.5% increase, 70 basis points above the national average. The unemployment rate remains low, at 4.1% as of August.
- Growth was led by the government sector, which added 8,100 jobs, followed closely by trade, transportation and utilities (7,800), which was helped in part by the \$54 billion Sound Transit 3 project, which will expand the existing Link light rail system in King, Pierce and Snohomish counties.
- The information sector remains a strong economic driver, with 4,100 jobs added, up 3.9% year-over-year. Many Bay Area firms are increasing their footprint in the metro, as employees move to the Puget Sound for a lower cost of living. Google's new 600,000-square-foot campus, Amazon's Tilt49, a 306,000-square-foot campus and Facebook's double footing contributed to the 7 million square feet of office under construction across the Seattle/Puget Sound region, of which 6.8 million square feet are located in Seattle and 750,000 square feet on the Eastside and South King County.
- The only sector that lost jobs was manufacturing, which contracted by 5,800 workers, representing a -3.4% year-over-year change. Boeing's move was the primary factor.

## Demographics

### Affordability

- The median home price reached a new cycle high of \$427,033 in the first half of 2017, with the average mortgage payment comprising 24% of the median income. With the average rental rate, at \$1,751 as of October, accounting for 25% of income, owning continues to be slightly more affordable than renting.
- As rents continue to grow and new development is concentrated more on the luxury segment in core submarkets, the city council approved the Mandatory Housing Affordability, which will require developers to either include affordable housing units in each project or contribute to a fund dedicated to future housing projects. The requirements target areas such as Downtown, University District, South Lake Union and Uptown.

### Seattle Median Home Price

Source: Moody's Analytics

### Population

- Seattle has added 246,000 residents since 2012, a 6.9% growth rate, well above the 2.9% U.S. average. The metro is expected to attract more residents, due in part to growth in employment.

### Seattle vs. National Population

	2012	2013	2014	2015	2016
National	313,998,379	316,204,908	318,563,456	320,896,618	323,127,513
Seattle Metro	3,552,815	3,609,617	3,667,042	3,727,097	3,798,902

Sources: U.S. Census, Moody's Analytics

## Supply

- Multifamily development in Seattle is robust, with more than 8,500 units delivered year-to-date through October. Completions are expected to reach 10,000 for the year, which would mark a 4.6% increase in stock, slightly down from 2016's cycle high of 11,000 units.
- Development is likely to remain high, as more than 22,000 units were under construction as of October. According to Yardi Matrix' latest survey, occupancy for stabilized properties was 96.0% as of September. The increase in population, coupled with the expansion of major companies attracting young workers in the area, demand is likely to remain robust, especially in the Puget Sound submarkets.
- Deliveries are concentrated in the high-demand cores of Seattle and Belltown (6,879 units under construction), as well as South Lake Union area, where Amazon and Google's campuses are underway. Other submarkets with high development activity include Redmond (2,058 units), First Hill (1,201) and North Seattle (1,082).
- Onni Group of Cos.'s 41-story twin-tower—the largest project underway—will add 1,179 units and more than 28,000 square feet of retail space to the South Lake Union submarket.

## Transactions

- More than \$2.4 billion in properties changed hands year-to-date through October. Although that is running at a rate below 2016's \$3.9 billion sales volume, investor demand remains strong. Seattle has become more attractive to institutional investors, as the market grows and increases its international flavor. Per-unit prices hit a new cycle high of \$269,606, well above the \$135,622 national average. Acquisition yields for Class C assets in King County traded in the 4% to 5% range, while in Pierce County, returns for similar assets were roughly 120 basis points higher.
- Investors' appetite was geographically diverse, mostly in secondary submarkets such as Belltown (\$401 million), Kent (\$331 million), Mercer Island (\$306 million) and University (\$257 million). The largest transaction of the year was Weidner Investment Services' \$225 million acquisition of Tower 12 from Continental Properties. The sale amounted to \$716,356 per unit.

## Definitions

**Lifestyle households (renters by choice)** have wealth sufficient to own but have chosen to rent. Discretionary households, most typically a retired couple or single professional, have chosen the flexibility associated with renting over the obligations of ownership.

**Renter-by-Necessity households** span a range. In descending order, household types can be:

- *A young-professional, double-income-no-kids household* with substantial income but without wealth needed to acquire a home or condominium;
- *Students*, who also may span a range of income capability, extending from affluent to barely getting by;
- *Lower-middle-income (“gray-collar”) households*, composed of office workers, policemen, firemen, technical workers, teachers, etc.;
- *Blue-collar households*, which may barely meet rent demands each month and likely pay a disproportionate share of their income toward rent;
- *Subsidized households*, which pay a percentage of household income in rent, with the balance of rent paid through a governmental agency subsidy. Subsidized households, while typically low income, may extend to middle-income households in some high-cost markets, such as New York City;
- *Military households*, subject to frequency of relocation.

These differences can weigh heavily in determining a property’s ability to attract specific renter market segments. The five-star resort serves a very different market than the down-and-outer motel. Apartments are distinguished similarly, but distinctions are often not clearly definitive without investigation. The Yardi® Matrix Context rating eliminates that requirement, designating property market positions as:

Market Position	Improvements Ratings
Discretionary	A+ / A
High Mid-Range	A- / B+
Low Mid-Range	B / B-
Workforce	C+ / C / C- / D

The value in application of the Yardi® Matrix Context rating is that standardized data provides consistency; information is more meaningful because there is less uncertainty. The user can move faster and more efficiently, with more accurate end results.

The Yardi® Matrix Context rating is not intended as a final word concerning a property’s status—either improvements or location. Rather, the result provides reasonable consistency for comparing one property with another through reference to a consistently applied standard.
