Potential Headwinds: Interest Rates and Possible Legislation

Interest Rates

- Increasing interest rates will have a negative impact on development
 - Increasing costs
 - Decreasing supply
 - Declining availability of debt financing and equity financing for construction
 - Current homeowners and SFR investors are holding onto low interest rate mortgages, which is impacting availability in the market
- **Potential Legislation** presented at the House Financial Services Subcommittee on Oversight and Investigations
 - Rental Housing Registry Ordinance
 - Rental property databases
 - Landlord registries
 - Just Cause Eviction legislation
 - Anti-competitive legislation
 - Rent control
- More competition as more developers look to purchasing rental properties as their near-term strategy

However, This Could Also Create SFR/BTR Investment Opportunities

- Due to rising interest rates, an increasing number of traditional home buyers are pulling out of the market
- Builders are stuck with more homes than they can sell
 - Offering to sell to landlords at 15%-20% discounts
- 62.5% more homes under construction June 2023 than previous year
 - Selling to landlords is cheaper involves less customizations
- Major homebuilders reportedly walking away from building projects
 - Lennar Corp., KB Home
- Investor focus is still primarily existing homes
 - New home purchases still only around 2% of investor home purchases (John Burns RE Consulting)
 - Empty lots or communities can help build margins in any market
- Home builders selling to investors means fewer options for home buyers but also protects current homeowners by keeping home prices from falling further than they may otherwise
